Policy Development and Analysis Staff

Subject: **Request for Withholding Information from Public Disclosure Pilgrim  
Nuclear Power Station (TAC No. MB5603)**

By Reference 1, the NRC denied GE's request to withhold from public disclosure the Pilgrim Safety Analysis Report for Thermal Power Optimization (TSAR) NEDC-33050P, Revision 0. Entergy Nuclear Operations, Inc (ENOI) submitted the TSAR to the NRC by Reference 2. The TSAR was provided to support a requested license amendment by ENOI and was not submitted in a rule making proceeding. GE hereby requests, pursuant to 10 CFR 2.790(c) that the referenced Pilgrim TSAR be withdrawn.

GE provided ENOI with a revision of the TSAR, which revises the identification of the proprietary information in the TSAR, as well as revising the basis for the proprietary protection. The proprietary information is protected by a simple redaction as requested by your letter (Reference 1). A proprietary and a non-proprietary version of the TSAR were provided. GE, as the owner of Revision 0 of this information, requests that Revision 0 of both of the TSARs be withdrawn. ENOI will be submitting the revised TSAR shortly to support its license application.

If you have any questions about the information provided here please contact, Ed Schroll at (408) 925-2224 or myself.

Sincerely,

George Stramback  
Regulatory Services, Project Manager
