Washington, DC 20555

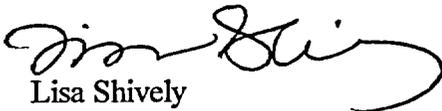

Dear Mr. Lesar,

I am not a resident of Hartsville, but I do live in the Middle Tennessee area and just want to voice my opposition to the proposed Uranium Enrichment Facility. This is one of the most beautiful parts of the state that has been consistently mis-used by the federal government and it's energy policies. Mostly farmers or factory workers, the area does not need a plant that has no guarantees as to it's safety and the safety of the trucks delivering their waste products to the facility.

I'm originally from the West Coast and since moving here have been shocked by the disregard for the environment by authorities. I live along I-40 and in all my years in Los Angeles have never seen so many tractor trailer accidents. Accidents that seem to happen only because of sloppy drivers. The thought of trucks driving through this area with the uranium and uranium wastes is horrifying.

Please say no to the Hartsville facility.

Sincerely,

Lisa Shively
