Mr. William Kane, Director  
Spent Fuel Project Office  
Office of Nuclear Material Safety and Safeguards  
U.S. Nuclear Regulatory Commission  
11545 Rockville Pike  
Rockville, MD 20852

**Subject:** Administrative Revision - NRC Certificate of Compliance Number 9277  
for the Model FSV-1 Shipping Cask Unit #3

Dear Mr. Kane:

General Atomics (GA) hereby submits one copy of the Consolidated Design Report for the Model FSV-1 Shipping Cask, GADR 55 Volumes I and II (GA Document No. 910013, Revision B) in support of the administrative revision of the existing NRC Certificate of Compliance No. 6346. GA understands that the NRC will issue a separate Certificate of Compliance (No. 9277) for Model No. FSV-1 Unit #3, which is owned by GA. A label on the inside cover of GADR 55 states that all references to "FSV-1" in the document should be understood to mean "FSV-1 Unit #3." The Certificate should be issued to:

General Atomics  
3550 General Atomics Court  
San Diego, CA 92121-1194  
Attn: Dr. Keith Asmussen

GA requests that the new CoC be issued with no amendments to the current certificate or to GADR 55, which is the Safety Analysis Report for Packaging. GA is a registered user of the FSV-1 and maintains an NRC approved (Approval No. 0030) Quality Assurance Program in accordance with 10 CFR Part 71 Subpart H.

If you have any questions, please contact Brian Laney at 619-455-4369 or me at (619) 455-2823.

Very truly yours,

Keith E. Asmussen, Director  
Licensing, Safety, and Nuclear Compliance
