8/2/02

SUBJECT: Clarification on Leak Testing Requirements

SUMMARY: On 8/2/02 Ms. Hellinghausen called with questions regarding the leak testing of TRUGLO's bow sights. She believed that leak testing, which NRC requested to be performed for the QA program, was not required for the product. I informed Ms. Hellinghausen that leak testing would be required. Upon further discussion and research, it was determined that NUREG Guide 1556, Vol. 8 Sec 9-10 allows for leak testing through light output and brightness observations, which were to be conducted in TRUGLO's QA program. I informed Ms. Hellinghausen of this. Therefore, no additional steps for TRUGLO are needed to satisfy leak testing.

ACTION REQUIRED: None
