November 29, 2002

Ms. Rebekah Pearson
U. S. General Service Administration
1800 F Street, NW
Washington, DC 20405-0002

Dear Ms. Pearson:

I am responding to the October 10, 2002, request from Mr. Wagner to provide information required by the Federal Employees Clean Air Incentives Act (Public Law 103-172). The completed forms are enclosed and will be e-mailed to Helen Harlow as requested.

The Nuclear Regulatory Commission continues to actively promote the use of public transit services, car pools, van pools, bicycling, and walking through transportation fairs, employee announcements, and newsletters to reduce traffic congestion during peak hours. These efforts have been instrumental in achieving the goals of our traffic mitigation agreement with Montgomery County, Maryland.

Specifically, our transportation program includes the following incentives:

- transit subsidies at the headquarters and three regional offices;
- bicycle racks, lockers, and showers for bicyclists at headquarters location; and
- non-monetary incentives including flexitime, compressed work schedules and priority parking assignments for employees who use car pool or van pools to commute to work.

If you need additional information, please contact Valeria Wilson, Director, Division of Administrative Services, at (301) 415-7436 or email vhw@nrc.gov.

Sincerely,

/RA/

Michael L. Springer, Director
Office of Administration

Enclosure: As stated
