Subject: Docket 71-6347: FSV-3, Package Renewal.

Dear Miss Jackson:

General Atomic is the primary licensee for the FSV-3 shipping package used for continued shipments of HTGR fuel elements to the Ft. St. Vrain reactor. We have recently undertaken a number of steps to have the subject certificate of compliance renewed. Subsequently, we have been advised that the review considerations have been stopped primarily because of the inclusion of U-233 as an authorized content and that appropriate renewal fees had not been submitted with our consolidated application, dated February 19, 1982. This confirms our intent to delete references to U-233 in greater than 200 times a Type A quantity as an authorized content at this time and to transmit the $150 renewal fee. Revised pages to the safety analysis submitted February 19, 1982, will be forwarded under separate cover.

We understand that with the payment of this fee and the commitment to remove references to U-233 as an authorized content that the staff will be permitted to move forward with the renewal of the Ft. St. Vrain packaging certificate of compliance for an appropriate period which we understand to be five years.

Should there be any further questions in this matter, do not hesitate to call me at (714) 455-2823.

Very truly yours,

H. N. Wellhouser 20402
