"Analysis of Railroad Car .

nmss

Debbie,

I think Chris did a great job on this analysis. I support his conclusions and believe that any additional confirmation that we can provide now will be of great use to DWM for the Repository hearings.

**ACTION: Review & Comment Please
Mark Delligatti & Mysore Nataraja.**

Thank you in advance.
Debbie

I have reviewed Chris' analysis of the Relationship Between the proposed effort to be performed by the Center, "Analysis of Railroad Car Materials and Coatings Exposed to a Tunnel Fire Environment As It Relates to the U.S. Nuclear Regulatory Commission's Responsibilities Under the Nuclear Waste Policy Act."

I am asking Mark Delligatti to review it as well as Mysore Nataraja (DWM) RDTME, KTI, PEM. I think it demonstrates a direct tie to the NWPA and the KTI work in RDTME.
