Statement of Work -

Establishing Pricing and Scheduling for the Conducting Inspections Course as part of support for the new MC-1245 Inspector Qualification Program.

1. BACKGROUND:

The Nuclear Regulatory Commission (NRC) has established a training program to support the training of NRC inspector personnel. The specification for Inspector Qualification are delineated in NRC Manual Chapter (MC) 1245 "Qualification Program For The Office Of Nuclear Reactor Regulation Programs" As part of this program individuals become familiar how to conduct inspections and with the methodology of inspection programs used by the NRC. The Inspecting for Performance course is a necessary technique for NRC Inspectors to be familiar with. As the new NRC MC requires attendance at the Conducting Inspections Course, the course development specifications determine that the IFP component should be included in the Conducting Inspections Course. To support this requirement, a course needs to be developed and implemented which incorporates IFP as well as the previous Fundamentals of Inspection course.

Draft Development work was conducted under MOD 12 to the IFP contract and a course has been finalized after pilot course presentation in Region III.

2. OBJECTIVE:

The objective of this work is to establish pricing and scheduling requirements for the Conducting Inspections Course to support the new NRC MC 1245 qualification.
