NOV 26 2002

MEMORANDUM FOR: Mark R. Arenaz, DOE/ID

FROM: R. Dennis Brown, Director *James Blaylock to*
Office of Quality Assurance

SUBJECT: Audit Report EM-ARC-02-10

Enclosed is the subject audit report of the Office of Environmental Management National Spent Nuclear Fuel Program (NSNFP) audit conducted by the Office of Quality Assurance at Idaho Falls, Idaho, on September 23 through 26, 2002.

The audit team determined that, with the exception of the six conditions adverse to quality identified during the audit, the NSNFP is satisfactorily implementing the examined portions of the NSNFP Quality Assurance (QA) Program. The NSNFP QA Program was found to be compliant with DOE/RW-0333P, Revision 12, *Quality Assurance Requirements and Description*, except as noted in two of the six conditions adverse to quality. These conditions adverse to quality are addressed in Sections 5.3.1 and 5.3.2 of the audit report.

The audit is considered completed and closed as of the date of this letter. However, the open deficiency documents will continue to be tracked through closure.

If you have any questions, please contact either James Blaylock at (702) 794-1420 or John R. Doyle at (702) 794-5021.

ENCLOSURE

1.0 EXECUTIVE SUMMARY

As a result of the Office of Civilian Radioactive Waste Management (OCRWM) Office of Quality Assurance (OQA) audit EM-ARC-02-10, the audit team determined that with the exception of the six identified conditions adverse to quality, the National Spent Nuclear Fuel Program (NSNFP) is satisfactorily implementing the examined portions of the NSNFP Quality Assurance (QA) Program. The NSNFP QA Program was found to be compliant with the DOE/RW-0333P, Revision 12, *Quality Assurance Requirements and Description* (QARD) except for two conditions adverse to quality, which related to the NSNFP QA program not implementing QARD requirements.

The applicable QARD sections reviewed by the audit team were determined to be effectively implemented with the exception of elements 1.0, 7.0, and Supplement V. Section 1.0, "Organization," was determined to be unsatisfactory pending the resolution of NSNFP Corrective Action Report (CAR) 02-NSNF-AU-001-CAR-002, which pertains to the independence of the QA organizations from cost and schedule. Section 7.0, "Control of Purchased Items and Services," was determined to be unsatisfactory due to the Idaho National Engineering and Environmental Laboratory (INEEL) Spent Nuclear Fuel (SNF) Program being "conditionally qualified" without having a mechanism in the NSNFP to allow for such conditions. In addition, NSNFP CAR 02-NSNF-AU-001-CAR-001 documents a programmatic breakdown of this element and remains open. Supplement V was determined unsatisfactory based on a lack of procedure controls for electronic management of data activities being performed.

The six conditions adverse to quality resulted in the issuance of four Deficiency Reports (DR) and two Quality Observations in areas of implementing procedures, supplier qualification, control of electronic management of data, root cause analysis, and document review and revision.

The audit team evaluated the effectiveness of the corrective actions for three previously DRs issued as a result of last year's audit, EM-ARC-01-13. The audit team determined the corrective actions to be effective for these DRs, which have been closed.

The audit team identified noteworthy practices in the areas of training documentation and cross-checking, management tools used for deficiency tracking, records retrieval, and development/integration of the new implementing procedures.

2.0 SCOPE

The audit team conducted a compliance-based audit of the NSNFP in Idaho Falls, Idaho. The audit team, through interviews of cognizant personnel, reviews of documentation, and evaluation of procedures, assessed the adequacy and effectiveness of implementation of the NSNFP QA Program and applicable portions of the OCRWM QARD.

The audit team reviewed the status of three closed deficiency documents, issued as a result of the previous OQA audit, to determine the effectiveness of completed corrective actions by NSNFP.

In accordance with the approved audit plan, the following QA Program Sections were evaluated:

QARD Program Sections

1.0	Organization
2.0	QA Program
3.0	Design Control
4.0	Procurement Document Control
5.0	Implementing Documents
6.0	Document Control
7.0	Control of Purchased Items and Services
11.0	Test Control
16.0	Corrective Action
17.0	QA Records
18.0	Audits
Supplement I	Software
Supplement III	Scientific Investigation
Supplement V	Control of the Electronic Management of Data

3.0 AUDIT TEAM

- John R. Doyle, Navarro Quality Services (NQS)/Audit Team Leader
- Patrick V. Auer, NQS/Auditor
- Samuel E. Archuleta, NQS/Auditor
- Christian M. Palay, NQS/Auditor

4.0 AUDIT TEAM MEETINGS AND PERSONNEL CONTACTED

A pre-audit meeting was conducted at NSNFP offices on Monday, September 23, 2002. Daily debriefings were held to apprise NSNFP management and staff of the progress of the audit and any identified conditions adverse to quality. A post-audit meeting was conducted at NSNFP offices on Thursday, September 26, 2002. Personnel contacted during the audit, including those who attended the pre-audit and post-audit meetings, are listed in Attachment 1, "Personnel Contacted During the Audit."

5.0 SUMMARY OF AUDIT RESULTS

5.1 Program Effectiveness

The audit team concluded that, with the exception of those areas where conditions adverse to quality were identified, the NSNFP is satisfactorily and effectively implementing the examined portions of the QA Program and applicable implementing procedures. The results for each QARD Section evaluated are contained in Attachment 2, "Summary Table of Audit Results."

5.2 Audit Activities

Attachment 2, "Summary Table of Audit Results," provide results for each QA Program Section audited. The details of the audit, including the objective evidence reviewed, are documented in the audit checklist. The checklist is maintained as a QA record.

5.3 Summary of Conditions Adverse to Quality

The audit identified conditions adverse to quality, which resulted in the issuance of four DRs, and two Quality Observations.

Synopses of the documented conditions adverse to quality are detailed below. The DRs have been transmitted to NSNFP under separate letter.

5.3.1 Deficiency Reports

EM(O)-03-D-004

Although NSNFP is conducting modeling activities, applicable NSNFP procedures, i.e., Program Support Organization (PSO) 3.03, Revision 1, "Engineering Analysis," and PSO 19-01, Revision 1, "Engineering Documentation," do not contain methodology for control and validation of models per QARD Section 3.0 (Design Control), and Supplement III (Scientific Investigation). In addition, Program Management Procedure (PMP) 6.01, Revision 6, "Review and Approval of NSNFP Internal Documents" omitted the QARD Section 2.0 (Quality Assurance Program) requirement that individuals other than the preparer perform document reviews.

EM(O)-03-D-005

PMP 7.01, Revision 0, "Quality Program Acceptance for DOE SNF Sites," requires that acceptance of a DOE SNF site QA Program be based on satisfactory resolution of inconsistencies identified via desk top reviews, surveillances or audits. Contrary to the above, memorandum (NSNFP QA Manager to Director INTEC Programs Division) dated 9/5/02, conditionally qualifies the INEEL SNF Program. Said memorandum identifies approximately 15 conditions adverse to quality and provides interim guidance for corrective measures. There is no provision in the NSNFP QA Program for conditional qualification.

EM(O)-03-D-006

QARD, Supplement V, "Control of Electronic Management of Data," requires that controls and processes be in place for the management of data that exists or are used in electronic format. The Goth_SNF Software

Program is utilized for NSNFP quality-affecting activities and electronic files are routinely transferred from workstations to personnel computers and vice-versa. NSNFP does not have any implementing documents in place to satisfy the QARD requirements identified in Supplement V for the control of the electronic management of data.

EM(O)-03-D-007

Procedure Quality Assurance Staff (QAS) 16.02, Revision 6, "Corrective Action," requires that a root cause analysis be performed and submitted with the response to identified significant conditions adverse to quality. Contrary to these QAS requirements, no root cause was performed and, as a result, the root cause analysis documentation was not submitted with the response to CAR 02-NSNF-AU-001-CAR-001.

5.3.2 Quality Observations

The Quality Observation is used, based on the auditor's discretion, to document a minor condition adverse to quality requiring only remedial action that has no residual impact and can reasonably be expected to be completed within 30 days.

EM(O)-03-O-005

Quality Observation, EM(O)-03-O-005, identifies that a required reviewer was not identified as a mandatory reviewer for the review of DOE/SNF/QAPP-001, Revision 1, "National Spent Nuclear Program Quality Assurance Program Plan" as per the requirements of PMP 6.01.

EM(O)-03-O-006

Change bars required by PMP 2.07, Revision 0, "Preparing the NSNFP Quality Assurance Program Plan and QARD Requirements Matrix," were omitted from DOE/SNF/QAPP-001, Revision 1.

5.3.3 Follow-up of Previously Issued Deficiency Documents

EM-00-D-143. This condition adverse to quality identified the lack of performance-based audits conducted by the NSNFP in support of OCRWM-related work.

EM-00-D-144. This DR identified that Fiscal Year 2001 Quarterly NSNFP Assessment Schedules did not identify surveillances with unique numbers nor were the surveillances tracked through closure prior to being removed from the assessment schedule.

EM-00-D-145. This DR documented that corrective actions to internally generated deficiency documents were not being completed and closed in a timely manner.
