SUBJECT: CLOSEOUT OF CONFIRMATORY ACTION LETTERS RIII-01-002
AND RIII-01-002 (SUPPLEMENT) - G. E. MORRIS

Dear Mr. Monetta:

On October 25, 2001, the U.S. Nuclear Regulatory Commission (NRC) issued a Confirmatory Action Letter (CAL) RIII-01-002 and a supplement CAL on December 14, 2001, for the Morris facility. The CALs were issued to document your commitments to implement both short and long term corrective actions which address specific aspects of your physical security protection program.

Based on your October 24, 2001, and November 15, 2001, letters and our inspection activities of these commitments documented in Inspection Report 07200001/2002-001(DNMS), we have determined that you have met all of the commitments as specified in the above CALs. The long term commitments of these CALs have been superceded by the NRC's Order dated May 23, 2002, which specified additional physical security requirements. Your letter of October 29, 2002, documents your compliance with this Order. The NRC will perform an inspection to verify your compliance with the Order. Accordingly, these CALs are considered closed.

In accordance with 10 CFR 2.790 of the NRC's "Rules of Practice," a copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records (PARS) component of NRC's document system (ADAMS). ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html> (the Public Electronic Reading Room).

Sincerely,
/RA/
J. E. Dyer
Regional Administrator
