SUBJECT: NEW ENGLAND POWER COMPANY SPECIAL NUCLEAR COMMITTEE

Dear Mr. Stenger:

This is in response to your letter dated November 21, 2002, to Mr. Samuel J. Collins, Director, Office of Nuclear Reactor Regulation (NRR). In your letter, you indicated that New England Power Company (NEP) is planning to dissolve its Special Nuclear Committee (SNC) by December 31, 2002, given the completion of NEP's divestiture of its interests in the Millstone and Seabrook facilities. Your letter stated that NEP is no longer a U.S. Nuclear Regulatory Commission (NRC/the Commission) licensee.

The SNC was required to be established by NEP under conditions contained in license transfer orders dated December 10, 1999, and February 24, 2000. These conditions also provided, *inter alia*, that "[n]o material changes with respect to the Special Nuclear Committee may be made without the prior written consent of the Director, Office of Nuclear Reactor Regulation. The foregoing provisions may be modified by the Commission upon application and for good cause shown." In light of your letter, the NRC has concluded that the foregoing license transfer conditions should be and are modified such that prior written consent of the Director, NRR, to the dissolution of the SNC is not required.

Sincerely,

/RA/

John A. Zwolinski, Director
Division of Licensing Project Management
Office of Nuclear Reactor Regulation
