**WITHDRAWAL OF RELIEF REQUEST PR-07 - REQUEST FOR RELIEF FROM ASME
CODE REQUIREMENTS FOR INSERVICE INSPECTION PRESSURE TEST
PROGRAM (TAC NO. MB4281)**

By letter dated February 27, 2002, Nuclear Management Company, LLC (NMC) requested approval for relief from selected pressure testing requirements of the American Society of Mechanical Engineers Boiler and Pressure Vessel Code, Section XI, 1989 Edition. NMC proposed an alternative to the specified examination requirements, in accordance with 10 CFR 50.55a(a)(3)(i), for the remainder of the current ten-year inspection interval.

NMC requested approval of the proposed relief request to support planning for the next refueling outage. NMC has since determined that this relief request is not required to support the coming refueling outage and is therefore withdrawing this request at this time.

SUMMARY OF COMMITMENTS

This letter contains no new commitments and no revisions to existing commitments.
