Attention: Mr. C.E. MacDonald, Chief
Transportation Certification Branch

Reference: Docket 71-5979
AOS Model 5979 Shipping Cask
USA/5979/B()

Dear Mr. MacDonald:

ALPHA-OMEGA SERVICES, Inc. hereby requests an amendment to Certificate of Compliance Number 5979, Revision 3, adding as authorized contents 3,000 curies of Cesium 137 in Special Form encapsulation.

The AOS Model 5979 cask is currently authorized to carry a maximum of 15,000 curies of Cobalt 60 in Special Form encapsulation with a package heat load limit of 200 watts. This requested amendment would also permit the carriage of 3,000 curies of Cesium 137 in Special Form encapsulation meeting the requirements of 10 CFR 71.4 (o). The 200 watt package heat load limit would apply to the Cesium contents as it does to the Cobalt contents.

The Cesium gamma energy, at approximately .66 Mev per disintegration, is substantially lower than that of Cobalt 60, which produces two gamma photons of 1.33 Mev and 1.17 Mev per disintegration. On a per-curie basis, the Cesium source strength is about one-fourth of that of the Cobalt. Furthermore, the proposed Cesium loading in the Model 5979, is one-fifth of the currently authorized Cobalt contents. It is clear from above that the proposed Cesium contents are well within the design basis of the Model 5979 cask.

We believe that the requested addition to the authorized contents constitutes an administrative amendment when we compare the Cesium source parameters to the Model 5979 cask design. Accordingly, a check in the amount of \$150.00 is enclosed in compliance with 10 CFR 170.31 (11) (C).

We have a fairly pressing shipping schedule which calls for the movement of a Cesium source on April 21, 1983. We apologize for the timing of this amendment request, and hope that your review process will allow us to meet our shipping commitments. If you have any questions on the above amendment request, please contact: Mr. Bruce Hedger, of our firm at (213)630-4221.

Respectfully submitted,

ALPHE-OMEGA SERVICES, Inc.
