Perry Nuclear Power Plant
Docket No. 50-440
Subject: Semiannual Fitness-For-Duty Report

Ladies and Gentlemen:

In accordance with the requirements of 10CFR26.71(d), "Recordkeeping Requirements," the Semiannual Fitness for Duty Report is being submitted for the Perry Nuclear Power Plant. This report covers the time period of July 1, 2001 to December 31, 2001.

Attachment 1 provides the Fitness for Duty Program performance data regarding testing results. Attachment 2 provides additional information regarding reported events and management actions taken in response to positive results. The provisions of the Fitness for Duty Program apply to persons granted unescorted access to the Protected Area of the plant, as well as to licensee, vendor, and contractor personnel required to physically report to the Technical Support Center or the Emergency Operations Facility in accordance with the Emergency Plan and associated implementing procedures.

If you have questions or required additional information, please contact Mr. Gregory A. Dunn, Manager – Regulatory Affairs at (440) 280-5305.

Very truly yours,

Short-Term Contractors	0	0	0	0	0	0	0					
Total	1	0	0	0	0	0	0					1

Management Actions Taken

Drug and alcohol testing results for the reporting period are described in Attachment 1.

The licensee employee, testing positive for illegal drugs during pre-access testing was denied access to the Protected Area. Pursuant to Nuclear Operating Procedure, NOP-LP-1002, "Fitness for Duty," the individual and/or his/her company representative was informed of the right to appeal, and of the procedural requirements in order to re-instate unescorted access to the Protected Area. To date, this individual has not initiated steps to restore unescorted access.

Seven (7) individuals were subjected to unannounced follow-up testing during this reporting period, as a result of a Fitness for Duty Program concern.

Initiatives Taken

Focus this reporting period was on providing Fitness for Duty Supervisory training to applicable site supervision. Several supervisors exceeded the site re-qualification requirement. The incidents were documented in the site's corrective action program, compensatory measures taken were appropriate, and additional training was provided to the affected supervisors. The development of a common Fitness for Duty Program for the three (3) FirstEnergy Nuclear Operating Company sites including improvements in the process utilized in the selection of personnel for testing, continued. Efficiencies in the data gathering process, and clearer delineation of short-term, long-term, and licensee employees were made.

Reported Events
