

CRYSTAL RIVER UNIT #3 SUPERINTENDENT SHIFT OPERATIONS' LOG

Tuesday, April 2, 2002
Martin Wolf / Dave Schulker
0700-1500

PLANT STATUS: Mode 1, 100% Power, 2544 MW_{TH}, 887 MW_E
Primary: 579 T_{AVE}, 1506 ppmb, PZR 220", 70 gpm Letdown,
Secondary: 79/75% OTSG, 2.1 Hga Vacuum, 77°F UHS
Rx Bldg.: 118°F Ave., 0.0 psig, AHF-1A: Low, AHF-1B, High & SW Cooled

| Int. | Time* | Item | Description |
|------|-------|------------------|--|
| MGW | 1039 | Relief | Martin Wolf assumes the duties of Superintendent Shift Operations [0635]. Dave Schulker assumes the duties of Control Room Supervisor [0705]. |
| MGW | 1042 | Computer | The plant computer was removed from service to support a software change per EC 48579. The additional surveillance activities associated with the following ITS requirements are applicable [0803]: <ul style="list-style-type: none"> • ITS SR 3.2.1.2, Regulating Rod Insertion Monitor Alarm; • ITS SR 3.2.4.1, Quadrant Power Tilt Monitor Alarm; • ITS SR 3.2.3.1, Axial Power Imbalance Monitor Alarm. CR-1/2 were notified that CR-3 CW discharge temp is not available. Also during this time, the ERDS is not functional. The actions of NOD-31 Table 1 is applicable to ERDS. |
| MGW | 1258 | WDGA-1 | The H ₂ /O ₂ Monitor was out of service [1107-1257] to support sampling of the MUT gas space by Chemistry. The compensatory actions of the ODCM, Section 2.16, were applicable during this time. Face-to-face notification of valve alignment verification and return-to-service was performed by the Chemistry Technician (S. Kirkland). |
| MGW | 1320 | Turtle Update | Received notification from Pete Ezzell that the distressed 17 inch turtle transported to the Mariculture Center last evening died. A necropsy of the turtle will be performed to re-evaluate reportability requirements. A Reportability Evaluation Worksheet has been generated for NCR 58575 with a due date of 4/26/02. |
| MGW | 1327 | Turtle NCR 57794 | The Reportability Evaluation Worksheet generated for NCR 57794 for the turtle that died on March 20, 2002 has been extended from April 4, 2002 to April 12, 2002. The reportability of this turtle will be determined by the results of the necropsy which is expected April 8, 2002. |
