

January 13, 2003

MEMORANDUM TO: William H. Ruland, Director
Project Directorate IV
Division of Licensing Project Management
Office of Nuclear Reactor Regulation

FROM: Brian Benney, Project Manager, Section 2 /RA/
Project Directorate IV
Division of Licensing Project Management
Office of Nuclear Reactor Regulation

SUBJECT: SUMMARY OF MEETING HELD ON NOVEMBER 14, 2002, WITH THE
WESTINGHOUSE OWNERS GROUP (WOG) AND THE COMBUSTION
ENGINEERING OWNERS GROUP (CEOG)

On November 14, 2002, the NRC staff held a senior management meeting with the WOG and the CEOG at the NRC Headquarters in Rockville, Maryland. The purpose of the meeting was to discuss the integration of the CEOG and the WOG, and their high priority issues. In addition, the risk-informed anticipated transient without scram (ATWS) model and regulatory interface improvements were discussed

The WOG began the meeting with an overview of the approved *New* WOG organization. The *New* WOG will represent 35 members in 10 countries operating 152 reactors. The WOG presented a redefinition of large break loss-of-coolant accident. The WOG continued with a discussion on high burnup lead test assemblies, a risk-informed ATWS model, along with material and security issues. The staff presented their perspective in each area.

The WOG concluded by reviewing the 14 topical reports being reviewed by the NRC. The staff thanked the WOG for their presentation. Meeting slides are available in ADAMS (Accession No. ML023450620).

One Action Item was developed in the meeting to resolve the issue of referencing the high burn-up lead test assembly topical report in the technical specifications, and issue the Safety Evaluation. This item has been completed and the Safety Evaluation has been issued on January 8, 2003.

Project Nos. 692 and 694
