SUBJECT: REIMBURSABLE AGREEMENT RELATED TO THE PEBBLE BED MODULAR
REACTOR

DPBA has received for concurrence the attached Modification 1 to our reimbursable agreement with DOE related to Pebble Bed. The agreement has been re-titled, "Advanced Gas Reactor Framework, Technology and Fuel Evaluation," and provides NRC with \$480,000, for both contract support and NRC staff costs.

Mod 1 to reimbursable agreement was originally drafted in April, 2001. At that time, both DPBA and OGC expressed concerns that the Statement of Work (SOW) defined NRC's activities as developing a regulatory framework for licensing reactors. After discussions with OGC, RES agreed to revise the SOW to focus on NRC performing a technology assessment or generic research (see attached markup which was approved by Brian Kildee, OGC). Rather than the Economy Act, the reimbursement would be authorized under NRC's cooperative research authority. The NRC accepts funds under our cooperative research authority to perform research which falls within NRC's statutory mission.

Please note that RES wishes to charge costs of the June 12-13 meeting with Exelon to the agreement. The meeting activities with Exelon appear to be licensing and regulatory in nature, and not billable to DOE. The agreement is ambiguous regarding charging costs incurred prior to signature.

If possible, I would appreciate any comments on this agreement by June 14.

Part III - Funding Methods and Billing Instructions

51. Funds-Out Agreement/Disbursement Agreement

☒ **Reimbursement, or** Request for repayment of actual costs must be itemized on OPAC or other Form previously approved by DOE's Contracting Officer and submitted to the U.S. Department of Energy, Accounts Payable Division, PO Box 500, Germantown, MD 20875-0500. Quarterly cost reports will be forwarded to the U.S. Department of Energy, Accounts Payable Division, P.O. Box 500, Germantown, MD 20875-0500.

☐ **Progress**

☐ Monthly ☐ Quarterly ☒ Upon Completion of Work

☒ **Advance** Only available for use by Federal agencies on working capital funds or with appropriate justification of need for this type of payment method. Unexpended funds at completion of work will be returned to DOE. Quarterly cost reports will be forwarded to the U.S. Department of Energy, Accounts Payable Division, P.O. Box 500, Germantown, MD 20875-0500.

Part IV - Acceptance Conditions

DOE IA ID No. DE-AI01-NE-23069

52. General Conditions

The Servicing Agency covenants and agrees that it will expeditiously initiate and complete the project for which funds have been awarded under this agreement.

Special Conditions:

A. Patents and Technical Data. Disposition of rights to inventions made in any contract, grant, or cooperative agreement under this Agreement with any small business firm or domestic nonprofit organization will be in accordance with 35 U.S.C. 200-212. In all other contracts, grants, or cooperative agreements under this agreement, the Servicing Agency shall coordinate the disposition of rights to inventions with the DOE Patent Counsel.

B. Issue Resolution. Unless otherwise indicated below, it is expected that programmatic guidance will be handled through discussions between the staff of the Servicing Agency's Project Officer listed on the Face Page, Item 10 and the DOE Project Officer, Face Page, Item 9. Any administrative issues including billing questions, unresolved items or issues requiring a formal change to this Agreement shall be addressed to the DOE Contracting Officer, page 3 of 3, Item 54.

C. Termination. DOE may terminate this Agreement upon 30 calendar days written notice of such termination addressed to the Servicing Agency. In the event of such termination the Servicing Agency shall be reimbursed, to the extent permitted, for obligations actually incurred to the effective date of the termination and for commitments extending beyond the effective date of termination to a date not later than the date upon which the Agreement would have expired if not terminated under this paragraph, which the Servicing Agency, in the exercise of due diligence, is unable to cancel. Payments under this Agreement, including payments under this article shall not exceed the amount(s) committed under this Agreement.

D. Other. Government estimate for the Project Period shown in Block 11 is \$ 500,000.00

PART V - OFFER AND ACCEPTANCE

Note: The agreement/modification must be accepted by the Servicing Agency official in duplicate and one original returned to the party named in Item 54. The agreement/modification must be forwarded to the address cited in Item 54 after acceptance signature.

Receipt of a written refusal or failure to return the properly executed document will result in rejection of all payment requests to the DOE's Controller's Office.

As the U.S. Government agency responsible for the development and execution of civilian nuclear energy research and development programs, the Department of Energy (DOE) seeks the assistance of the U.S. Nuclear Regulatory Commission (NRC) to help assess advanced gas reactor technology and fuels to support potential future deployment of these advanced nuclear energy systems in the United States.

Phase II Activities:

1. Gas Reactor Framework (\$300k) - Conduct work, in coordination with the Department of Energy (DOE) and industry to assess the technical and safety issues associated with the technology that supports advanced high temperature gas reactors (HTGR). New advanced gas reactor concepts such as the Pebble Bed Modular Reactor (PBMR), and the Gas Turbine Modular Helium Reactor (GT-MHR) have been identified by DOE as reactor technologies for possible near-term deployment in the United States. An assessment that addresses the unique features of gas reactor technology and their associated key safety and technical issues affecting HTGRs is necessary.

Key Deliverables:

- Identification of technical and safety issues- December 2001
- Identification of resolution paths or methods - September 2002

2. Gas Reactor Analysis Codes V&V (\$100k) - assess adequacy of HTGR safety, transient and neutronics codes for modeling, data and verification.

Key Deliverable:

- Report on analysis codes to be used on HTGR designs.

3. Participation in International Gas Reactor Safety Activities (\$60k) - support NRC participation in conferences and meetings on technical and safety issues for HTGRs.

Key Deliverables:

- Conference and meeting reports.

4. HTGR Fuel Test Program Development (\$20k) - Assist DOE in the development and implementation of a HTGR Fuel Qualification Program. Activities will include program planning and development, fuel irradiation experiments, tests and analysis specification, identification of performance requirements for advanced gas reactor fuels. Initial tasks involve one technical expert in the planning of the fuel qualification program.

As the U.S. Government agency responsible for the development and execution of civilian nuclear energy research and development programs, the Department of Energy (DOE) seeks the assistance of the U.S. Nuclear Regulatory Commission (NRC) to help ~~develop a technical and assess regulatory framework for~~ advanced gas reactor technology to support potential future deployment of these advanced nuclear energy systems in the United States.

Phase II Activities:

Framework

Land fuels

Technology Assessment

DOE and

1. Gas Reactor Regulatory Framework (\$300k) - Conduct work, in coordination with industry, *to* ~~leading to the development of policy and regulatory framework for the licensing of high temperature gas reactors (HTGR). The existing regulations have evolved over time for application to light water reactor technology. New advanced gas reactor concepts such as the Pebble Bed Modular Reactor (PBMR), and the Gas Turbine Modular Helium Reactor (GT-MHR) have been identified by DOE as reactor technologies for possible near-term deployment in the United States. A regulatory framework needs to be developed that addresses the unique features of gas reactor technology and the associated licensing requirements. The Gas Reactor Regulatory Framework will include:~~
DOE and
~~Identification of key policy and technical issues affecting HTGRs. This will be performed.~~
~~Identification of current licensing criteria that are applicable to HTGR designs.~~
~~Identification of additional licensing criteria unique to HTGR design applications.~~

Key Deliverables:

- *technical and safety issues*
~~Identification of necessary HTGR policy & regulation changes - December 2001~~
~~Establish HTGR regulatory framework and policy - September 2002~~
Identification of path to resolution

2. Gas Reactor Analysis Code V&V (\$100k) - *assess* ~~institute development of NRC capability, expertise and confidence with HTGR safety, transient and neutronics codes, for adequacy of modelling, data and verification.~~

Key Deliverable:

- ~~Plan for conducting independent activities to verify and validate analysis codes to be used on HTGR designs.~~

Report on

3. Participation in International Gas Reactor Safety Activities (\$60k) - support NRC participation in conferences and meetings *on technical and* ~~to establish international safety standards for HTGRs.~~ *issues*

Key Deliverables:

- Conference and meeting reports.

4. HTGR Fuel Test Program Development (\$20k) - Assist DOE in the development and implementation of a HTGR Fuel Qualification Program. Activities will include program planning and development, fuel irradiation experiments, tests and analysis specification, identification of performance requirements for advanced gas reactor fuels. Initial tasks involve one technical expert in the planning of the fuel qualification program.
