FROM: Ashok C. Thadani, Director, RES **/RA/**

SUBJECT: DISTRIBUTION OF COMMITTEE ON THE SAFETY OF NUCLEAR
INSTALLATIONS REPORTS

Last year the Committee on the Safety of Nuclear Installations (CSNI) Working Groups (WGs) and Special Expert Groups (SEGs) issued 23 reports on various activities within their areas of responsibility. While these reports generally are distributed to CSNI members and WG/SEG members, some of the reports may be of use and interest to others in the NRC, including RES, as well as outside the NRC. An example of this is the July 2002 report on "Knowledge Base for Strainer Clogging—Modifications Performed in Different Countries" issued by the WG on operating experience. It contains information on what others have done to help resolve the strainer clogging issue which DET, NRR, and the Electric Power Research Institute (EPRI) may find useful.

As the NRC representative on the CSNI WGs/SEGs, I ask that for each report issued by your group, you consider whether or not it contains information that should receive a wider distribution and, if so, prepare a memorandum or letter for my signature transmitting the report. Each memo or letter should briefly summarize:

- the purpose of the work
- the significant results and how they could be of use
- plans for any follow-on work.

I ask that you begin by reviewing the reports issued in 2002, and where appropriate, prepare a transmittal memo/letter. As additional reports are issued in 2003 and beyond, this should become a routine part of your WG/SEG responsibilities.
