Subject: TALKED TO AMY CUBBAGE

She is indicating that the thinking on their part to make this public meeting non-fee for Exelon is:

Issues not directly related to the pre-appliation were put in the SECY
e.g. testing requirements added by Jim Wilson. Jim Wilson will be doing a rulemaking on testing requirements. The SRM directed a public meeting, Exelon does not have to attend meeting. Issues are generic to GT-MHR technology for other than Exelon, e. g. any applicant for a merchant plant.

All meeting with Exelon have been billed to them to date.

I asked who benefitted from the meeting, no direct answer.

I told her to power reactor licensee would be paying the costs.
No comment.

She is willing to change the code, if we ask her to do so.
