Subject: MOU with DOE (Pebble Bed)

Joel,

We have reviewed the subject MOU and do not have specific comments on the agreement itself. However, we do not believe the meeting on June 12 should be charged to the MOU. We view that meeting as a pre-application meeting with Excelon, and therefore think it should be charged under Part 170. Also, we believe it is very important that we understand what types of activities related to this new technology RES will be performing under the MOU and otherwise, and also that they have clear guidance on how to report their time (as fee billable under Part 170, or charged to DOE under the MOU). In this regard, we would like to set up a meeting with you and your OGC contact for MOU's and Tom King and other appropriate RES staff. Caryn (Jim's secretary) will be setting up the meeting.
