Subject: Fwd: Re: project number for DOE Adv Gas Reactor Tech

The project number 000-00715 has been issued for the DOE reimbursable agreement with NRC titled "Advance Gas Reactor Framework Technology and Fuel Evaluation."

All TAC numbers taken out for the activities should have the project number assigned to it.

The project number is used in the docket number field on the TAC table.

Offices need to contact the Document Control Desk to establish the E-RIDS distribution code for these correspondences.
