Dear Mr. Mallay:

Your letter of January 9, 2003, proposed that NRC's air-oxidation studies with Framatome cladding be conducted according to the 2002 Memorandum of Understanding on a cooperative nuclear fuel research program. Consistent with the MOU, we would not apply the provision regarding testing under LOCA condition since the studies are not LOCA tests and EPRI will not be a participant in the air-oxidation studies. We agree with your proposal and appreciate your providing the tubing for the air-oxidation tests.

Sincerely,
