Subject: Re: fuel RAI's

OK. Good idea. Yuri will be the coordinator for the response.

Undine,

I talked to Ralph and Yuri late yesterday. Stu and I think that the three "fuels papers", fuel design, fuel fabrication, and fuel qualifications should be reviewed together. When you, Yuri and Shanlai have completed your design, heat removal, and analytical code RIAs please combine and run through Ralph. I want RAI input to come from SRXB in one package with Ralph's approval.

I gave you a copy of the Exelon Fuel qualification plan which is the subject of the March 28 meeting. I will provide a new work request and new TAC to cover fuel topics. I have to talk to Stu to get an exact due date. Exelon wants feedback in May.

Thanks, Amy

Amy,

Please see the attached RAI's for the PBMR fuel paper.

I am currently a bit behind and will complete the RAI's for the PBMR design and heat removal preliminary description RAI's by COB Thursday.

Undine
