Subject: FYI: Corrections to Budget Writeup

) NR

FYI: Connie Schum called to ask about the budget writeup being prepared to forward to the Commission...something didn't seem "right" with the new reactor discussion. Which is quite the understatement given it still discussed PBMR, as in "a COL is expected in 2004".

I printed her copies of all the input we had this week regarding Assumption 3 (new reactors) and 20 (with respect to new framework among other things). I also went through the budget writeup noting where the assumptions needed to be changed and where these changes affected the Reactor Safety strategic arena discussion.

I told her I'd be willing to re-review the new reactor discussion and suggested that the regulatory framework changes be sent back through David Matthews/Tony Markley. The budget was apparently due from EDO yesterday, so any re-reviews will be on an extremely short turnaround. Heads up!!
