FYI - don't know if this is an LT issue. I told Liz Suarez to do this not and not churn other Divisions further with telling them now at this late date to reflect attached in their budgets (or else that would delay their submissions even further).

But I do need someone (LT? ET?) to assess reasonableness of attached and let me know whether to start incorporating it into office budget request. I think Mike may now have aligned with RES/NRR, but that may not be where Marty wanted him to go based on Carl meeting last week.

K/2
