Subject: Request for Amendment to the Certificate of Compliance No. 71-6581 for the Model No. 51032-1 Package

Attachment: EMF-52 Revision 7, Consolidated License Application for Framatome ANP Model 51032-1 Shipping Container, January 2003

Dear Mr. Monninger:

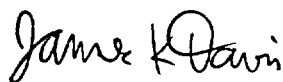

Framatome ANP formally requests an amendment to the Certificate of Compliance (C of C) for the above referenced shipping package. The attachment is a stand alone, consolidated document that replaces all past applications and revisions. The major changes from the previous applications are:

- The company name has been updated throughout.
- The maximum gross package weight changed from 7400 to 7500 pounds.
- Appendix VIII has been added to demonstrate the safe use of the container for three new fuel types (L1, L2, and L4).

The changed pages to the application are provided in the Attachment.

In order to support upcoming fuel shipments to Progress Energy's Crystal River Unit 3, Framatome ANP requests approval of the changes by mid June 2003. If you have any questions concerning this submittal, please call me at (509) 375-8464.

Very truly yours,

James K. Davis
Principal Engineer
Environmental, Health, Safety and Licensing
