MEMORANDUM TO: George C. Pangburn, Director  
Division of Nuclear Materials Safety, Region I

Douglas M. Collins, Director  
Division of Nuclear Materials Safety, Region II

Cynthia D. Pederson, Director  
Division of Nuclear Materials Safety, Region III

Dwight D. Chamberlain, Director  
Division of Nuclear Materials Safety, Region IV

Thomas H. Essig, Chief  
Material Safety and Inspection Branch  
Division of Industrial and  
Medical Nuclear Safety, NMSS

FROM: Patricia K. Holahan, Chief **/RA/**  
Rulemaking & Guidance Branch  
Division of Industrial and  
Medical Nuclear Safety, NMSS

SUBJECT: NUREG-1556, VOLUME 3, "CONSOLIDATED GUIDANCE ABOUT  
MATERIALS LICENSES: APPLICATIONS FOR SEALED SOURCE AND  
DEVICE EVALUATION AND REGISTRATION"

In accordance with NMSS Policy & Procedures Letter 1-74, "Procedures for Guidance Consolidation Project," a review/revision cycle was established for the NUREG-1556 series that will ensure they are up-to-date and provide current and effective guidance for staff, licensees and other stakeholders. The subject NUREG was published July 1998 and with the recent implementation of Part 35, this NUREG is in need of revision. This revision will also incorporate the recommendations identified by the Phase II team review of the byproduct materials program.

Your support is again being requested to identify an individual within your organization that will be available to serve as a member of the writing team for the revision of this document. We anticipate approximately 10-20% of the individuals time will be needed for this effort. Please provide the individuals name to me by January 31, 2003. A kick-off meeting for this review team will also be scheduled for mid February 2003. Our proposed schedule is to complete this revision by early summer.
