Medical Nuclear Safety, NMSS
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555-0001

Subject: Revision of Application for Renewal of Certificate of Compliance No. 9070, Docket
No. 71-9070

Dear Mr. Chappell:

Enclosed is revision 1 of the consolidated application for renewal of the of the Certificate of Compliance for the Model N-55 packaging. This revision corrects the reference to the DOT Specification 17H and 17C drums. These drum specifications are currently obsolete. The requirements for these drums have been incorporated into a specification sketch for acceptable drums to be used with this drum overpack. References to the 17H and 17C drums throughout the application have also been corrected. Also attached is Rev. C of Nuclear Packaging Drawing No. X-60-200D which was previously referenced in the Certificate of Compliance and should be in this application. This drawing represents packages previously tested, built, and may still be used in the field. Revision J represents the requirements that would be imposed on any new fabrication. Neither of these drawings have changed since the consolidated application approval. There are no technical changes in this document from previous submittals.

Enclosed are eight copies of the proprietary revision and two copies of the non-proprietary revision. None of the revised pages contain proprietary information.

If there are any questions, please contact me at (206) 661-4779.

Sincerely,

Vectra Technologies, Inc.

Charles J. Temus
