

JAN 02 1991

License No. SMB-1541
Docket No. 040-08980
Control No. 110418

Heritage Minerals, Inc.
ATTN: John F. Lord, Manager
P.O. Box 12
Lakehurst, New Jersey 08733

Gentlemen:

Please find enclosed your NRC material license.

Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the Region I Material Licensing Section, (215) 337-5093, so that we can provide appropriate corrections and answers.

Please be advised that you must conduct your program involving licensed radioactive materials in accordance with the conditions of your NRC license, representations made in your license application, and NRC regulations. In particular, please note the items in the enclosed, "Requirements for Materials Licensees."

You must have specific, written permission to release your facility for unrestricted use. The facilities must meet the criteria in the enclosed "Guidelines for Decontamination of Facilities and Equipment Prior to Release for Unrestricted Use or Termination of Licenses for Byproduct Source, or Special Nuclear Material". You should submit a report of the results of the surveys you performed to this office and refer to this letter when you request release for unrestricted use.

We have concluded that you will be required to decontaminate all areas within the buildings where source material is generated, the monazite pile, and any other areas where source material is used or stored, prior to release for unrestricted use. This is reflected in Condition 15 of the enclosed license. If you disagree with NRC jurisdiction over some of the areas where this condition requires decontamination and do not agree to the license condition, you may request a hearing on this matter in accordance with 10 CFR 2.1201 (Subpart L).

Since serious consequences to employees and the public can result from failure to comply with NRC requirements, the NRC expects licensees to pay meticulous attention to detail and to achieve the high standard of compliance which the NRC expects of its licensees.

You will be periodically inspected by NRC. A fee may be charged for inspections in accordance with 10 CFR Part 170. Failure to conduct your program safely and in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in prompt and vigorous enforcement action against you. This could include issuance of a notice of violation, or in case of serious violations, an imposition of a civil penalty or an order suspending, modifying or revoking your license as specified in the General Policy and Procedures for NRC Enforcement Actions, 10 CFR Part 2, Appendix C.

We wish you success in operating a safe and effective licensed program.

Sincerely,

Original Signed By:
John D. Kinneman
