Attn: Mr. Carl Withee, Project Manager
Re: Certificate Number 6574, Package Identification Number USA/6574/B()

Dear Mr. Withee:

The Scientific Ecology Group (SEG) requests renewal of the referenced certification for our 3-82B packaging as the current certification expires 4/30/96.

All aspects of the packaging and packaging documentation remain unaltered since our application of 3/13/91 with the exception of SEG document STD-P-02-024, Cask Handling Procedure for the 3-82B Shipping Cask. A revision was incorporated to provide lifting method specifics in Section 4.2.1 (a) that eliminate ambiguity with SEG document STD-R-02-014, Cask Safety Analysis Report.

In addition, the document has been revised to identify the specific lifting device suggested for used to lift the primary lid in accordance with Section 4.2.1 (b) and the upper impact limiter in accordance with Section 4.2.1 (c). These revision do not constitute any change to the design and utilization parameters as reflected in our application of 3/13/91.

I have enclosed a copy of SEG document STD-P-02-024, Revision 3 for your review. All other documentation previously submitted remains unchanged. If you require additional documentation or information, please do not hesitate to contact me directly at (423)376-8172. In the interim, we look forward to your response.

Very Truly Yours,

Joey F. McCarter
Senior Engineer
