

March 3, 2003

Memorandum To: Christopher I. Grimes, Program Director
Policy and Rulemaking Program
Division of Regulatory Improvement Programs, NRR

From: David L. Skeen, Section Chief */RA/*
Policy and Rulemaking Program, Section B
Division of Regulatory Improvement Programs, NRR

SUBJECT: SUMMARY OF MEETING ON DEFINING CRITERIA FOR THE REVIEW
OF ALTERNATIVE SITES

On Tuesday, January 28, 2003, the staff of the Reactor Policy and Rulemaking Program held a public meeting to solicit public input on whether the NRC should conduct rulemaking to codify the criteria for review of alternative sites as part of the environmental review for a new plant. Input was provided by representatives of the Nuclear Energy Institute (NEI), prospective applicants, a law firm, and a public interest group. One person, who was unable to attend, transmitted comments in an e-mail message to the staff. A copy of that message is attached to the transcript of the meeting.

The staff stated that it would prepare a NUREG report to address the subject of alternative site review criteria, and provide the technical basis for rulemaking should it be decided to proceed with rulemaking. Comments received at the meeting will be summarized and addressed in the NUREG report. Additional written comments received by February 28, 2003 will be summarized and addressed as well.

The staff also stated that an internet web page on this subject would be created. It would include appropriate background material, a transcript of the meeting, and additional comments received.

Additional details are provided in the attached meeting notice, transcript, agenda, slides, list of attendees.
