General Proficiency Level Signature Card and Certification	15
Form 1: General Proficiency-Level Equivalency Justification	17

Introduction

You may complete the General Proficiency requirements together with the Technical Proficiency requirements for your specific inspector classification.

Required General Proficiency Training Courses:

NOTE: You DO NOT have to complete Appendix A before completing the following courses.

1. Effective Communication For NRC Inspectors
2. Gathering Information for Inspectors through Interviews
3. Media Training Workshop

NOTE: You must complete Appendix A and receive Basic Inspector Certification before beginning the courses listed below.

Before signing up for any course, be sure that you have checked and have met any prerequisites.

These courses should be completed in the order listed.

- G-105, Conducting Inspections
- G-204, Root Cause/ Incident Investigation Workshop
- G-103, Field Techniques and the Regulatory Process

General Proficiency Individual Study Activity

PAGE INTENTIONALLY BLANK

General Proficiency Individual Study Activity

TOPIC: (ISA-General-1) Corrective Action Program

PURPOSE: This activity will provide you with a working knowledge of the contents of 10 CFR Part 50, Appendix B, industry standards, and the associated licensee programs and documents which collectively establish the basis for and support the implementation of an effective problem identification and corrective action program.

**COMPETENCY
AREA:** INSPECTION

**LEVEL
OF EFFORT:** 40 Hours

REFERENCES:

1. 10 CFR, Part 50, Appendix B
2. ANSINQA-1-1979, Quality Assurance Program Requirements for Nuclear Power Plants
3. Licensee Quality Assurance Program
4. Inspection Procedure 71152, Identification and Resolution of Problems
5. Inspection Procedure 40500, Effectiveness of Licensee Process to Identify, Resolve, and Prevent Problems

**EVALUATION
CRITERIA:** At the completion of this activity, you should be able to:

1. Discuss the general content of Part 50, Appendix B, and the eighteen criteria contained in the Appendix.
2. Discuss the “hierarchy” of quality assurance requirements.
3. Outline the key elements to an effective QA Program.
4. Discuss the principle steps in your reference site’s Corrective Action Program with respect to identification of a condition adverse to quality through final resolution.

TASKS:

1. Review and discuss the eighteen criteria of Appendix B with your supervisor, or qualified inspector, and communicate an understanding of their content and general application to field inspections, with emphasis on Criterion XVI, Corrective Action.
2. Review the basic regulations that require Quality Assurance. Review industry standards related to QA. Find where QA is addressed in an FSAR. Review a licensee Quality Assurance Program and its implementing procedures.
3. At your reference site, gain a general understanding of the licensee's Corrective Action Program (CAP) through a combination of discussions with a qualified resident inspector and attendance at routine CAP meetings.
4. At your reference site, using IP 71152 for guidance, review a sample of about six issues entered into the licensee's CAP within the past month and compare the licensee's actions versus regulatory requirements. Discuss the resolution of the issues with the resident inspector. This review should include the resolution of potential operability issues.
5. Meet with your supervisor or a qualified Operations resident inspector to discuss any questions that you may have as a result of this activity and demonstrate that you can meet the evaluation criteria listed above.

General Proficiency On-the-Job Activity

PAGE INTENTIONALLY BLANK

General Proficiency On-the-Job Activity

TOPIC: (OJT-General-1) Emergency Drill/Exercise Observation

PURPOSE: The conduct of an emergency drill/exercise allows the licensee to assess emergency response performance and the effective correction of previously identified weaknesses. It permits the evaluation of the level of quality of emergency response training, emergency plan implementing procedures, facility and equipment readiness, personnel performance, organizational and management changes and communications equipment readiness. This activity will permit you, the observer, to realize the scope of involvement of your particular discipline during a declared emergency at a nuclear power facility.

COMPETENCY AREAS: REGULATORY FRAMEWORK
INSPECTION

LEVEL OF EFFORT: 16 hours

REFERENCES:

1. IP 71114.01, "Exercise Evaluation"
2. IP 71114.06, "Drill Evaluation"
3. 10 CFR 50, Appendix E, Section IV.F
4. 10 CFR 50.47(b)

EVALUATION CRITERIA: At the completion of this activity, you should be able to:

1. Discuss the federal guidance for drill/exercise observations as described in IP 71114.01, "Exercise Evaluation" and IP 71114.06, "Drill Evaluation".
2. Determine the activities that will occur with regard to your discipline during the performance of an emergency drill/exercise.
3. Identify weaknesses and deficiencies in your discipline's area during drill/exercise performance.
4. Determine if the planning standards of 10 CFR 50.47(b) are still met as a result of observation of emergency drill/exercise performance with regard to your discipline.

5. Determine if licensee has demonstrated the capability of providing reasonable assurance that adequate protective measures can be conducted in your discipline in the event of a declared emergency.

TASKS:

1. Review IP 71114.01, "Exercise Evaluation" and IP 71115.06, "Drill Evaluation" to identify the inspection attributes provided for drill/exercise performance evaluations. Discuss any questions with a senior emergency preparedness inspector.
2. Review the regulatory requirements with regard to emergency preparedness contained within 10 CFR 50.47(b) and 10 CFR 50, Appendix E, Section IV.F.
3. Obtain an emergency drill/exercise schedule for applicable region. Coordinate your observation of an upcoming emergency drill/exercise with your supervisor, applicable regional senior emergency preparedness inspector and site senior resident inspector.
4. Become familiar with the applicable licensee Emergency Plan and Implementing Procedures. In particular, review those instructions for your discipline's activities and involvement during a declared emergency and develop an understanding of their successful implementation.
5. Obtain and review a copy of the applicable licensee's emergency drill/exercise scenario. Identify activities that will occur with regard to your discipline during the performance of the emergency drill/exercise and note the licensee expectations for success versus failure.
6. Perform an independent observation of licensee performance in your particular discipline during the conduct of the emergency drill/exercise. Pay particular attention to those activities you previously identified during your scenario review. To obtain an overall view, do not limit your observation to only one emergency facility. Perform observations in multiple licensee emergency response facility locations (eg., Control Room, Operations Support Center, Technical Support Center, Emergency Operations Facility, Joint Information Center, field activities, etc.). Take care not to interfere with the conduct of the licensee performance or evaluation of drill/exercise. Do not "prompt" licensee participants or evaluators of your observations or conclusions of weaknesses or deficiencies during drill/exercise performance. Findings must be held confidential until after formal licensee critique.
7. During the performance of the drill/exercise, note any possible weaknesses and/or deficiencies that may have occurred within

your discipline. To aid in future discussions, obtain documentation of licensee activities during these questionable performances.

8. As a result of your observations, form an opinion as to whether the planning standards of 10 CFR 50.47(b) are still met with regard to your discipline.
9. As a result of your observations, form an opinion as to whether the licensee has demonstrated the capability of providing reasonable assurance that adequate protective measures can be conducted in your discipline in the event of a declared emergency.
10. Discuss your emergency drill/exercise observations and opinions with the lead NRC inspector and provide recommendation on whether licensee demonstrated the capability of providing reasonable assurance that adequate protective measures can be taken in the event of a declared emergency and if the planning standards of 10 CFR 50.47(b) are met with regard to your discipline.
11. Meet with your supervisor and/or a qualified senior emergency preparedness inspector to discuss any questions that you may have as a result of this activity and demonstrate that you can meet the evaluation criteria listed above.
