FOIA/PA REQUEST
Case No: 2003-0180
Date Rec'd: 2-28-03
Action Off: Perf
Related Case: _____

FIOA Request

In preparation for the mid-cycle reviews, NRC Manual Chapter 0305 requires the regional offices to develop a meeting agenda as well as provide the plant issues matrix, the results of the PIs, and the proposed inspection plan for all plants.

NRC Manual Chapter 0305 also requires the regional offices to develop a Plant Performance Summary (see MC0305 exhibit 7) for those plants whose performance has been in the degraded cornerstone column, multiple/repetitive degraded cornerstone column, or unacceptable performance column of the Action Matrix during any quarter of the past twelve months. A Plant Performance Summary is also developed for those plants that the regional offices considers to have current substantive cross-cutting issues that should be included in the mid-cycle letter.

The Callaway Plant (50-483) falls into and has fallen into the category of requiring the preparation a Plant Performance Summary.

Please provide a copy of the Callaway Plant Performance Summary that was prepared for the recent End-of-Cycle Review meetings and a copy of the Plant Performance Summary prepared for the Callaway plant for the last Mid-Cycle Review.
