U.S. Nuclear Regulatory Commission  
Washington, D.C. 20555

Docket No. 71-6400

Reference: Letter from A. F. Olsen to C. E. MacDonald, dated  
February 10, 1982

Dear Mr. MacDonald:

This refers to my telephone conversation with Mr. R. H. Odegaarden  
of your staff regarding the reference letter and Section 5.(b)(5)  
of Certificate of Compliance No. 6400, Revision No. 9. Specifically,  
it is requested that the second paragraph of that aforementioned  
Section be amended to read as follows:

"Alternatively, liquid waste is solidified in concrete in  
maximum size one (1) gallon containers which are double  
bagged and heat sealed in 12-mil thick PVC and placed within  
a DOT Specification 17H or 17C steel drum (maximum size 55-  
gallons). The drum is lined with a sealed plastic liner and  
equipped with a standard drum closure. Each drum does not  
exceed a fissile quantity of 60 grams. For drums less than  
55-gallons, the total fissile quantity of all the sealed  
packages in one container must not exceed 200 grams."

This submittal should be considered as additional information for  
incorporation in the initial administrative amendment request made  
in the reference letter.

If you have any questions regarding this correspondence, please contact  
me at (412)842-0111, extension 502.

Sincerely,

*MAustin*
