(cont'd. from previous page)

11. This license is subject to an annual fee in accordance with Part He-P 4070, New Hampshire Rules for the Control of Radiation (NHRCR), for the applicable amount specified in Table 4070.1 of that Part.
12. The licensee shall comply with the provisions of Parts He-P 4001, 4003, 4019, 4020, 4021, 4022 and 4023, NHRCR.
13. A. Radioactive material listed in Condition 6 above shall only be used by John Turner, Clifford Jones, Jr. or individuals who have satisfactorily completed the manufacturer's training for gauge users, or other training course approved by the Bureau, and in addition have received the training described in application dated March 11, 1998, and letter dated May 26, 1998, and have been approved in writing by the Radiation Safety Officer. The licensee shall maintain records of individuals designated as users and their training for 5 years following the last use of licensed material by the individual.

B. The individual designated to perform the functions of Radiation Safety Officer (RSO) for activities authorized by this license is John Turner.
14. A. Each sealed source containing radioactive material other than Hydrogen 3, with a half-life greater than 30 days and in any form other than gas, shall be tested for leakage and/or contamination at intervals not to exceed six months. In the absence of a certificate from a transferor indicating that a test has been made within six months prior to the transfer, the sealed source shall not be put into use until tested.

B. The test shall be capable of detecting the presence of 0.005 microcurie of radioactive material on the test sample. The test sample shall be taken from the sealed source or from the surfaces of the device in which the sealed source is permanently mounted or stored on which one might expect contamination to accumulate. Records of leak tests results shall be kept in units of microcuries and maintained for inspection by the Bureau.

C. If the test reveals the presence of 0.005 microcurie or more of removable contamination, the licensee shall immediately withdraw the sealed source from use and shall cause it to be decontaminated and repaired or to be disposed of in accordance with the NHRCR. A report shall be filed within five days of the test with the Bureau of Radiological Health, Health & Welfare Building, 6 Hazen Drive, Concord, NH 03301-6527, describing the equipment involved, the test results, and the corrective action taken.

D. The licensee is authorized to collect leak test samples only for analysis by Troxler Electronics Laboratories, Inc. Alternatively, complete tests for leakage and/or contamination (sample collection and analysis inclusive) shall be performed by persons specifically licensed by the Bureau, the U.S. Nuclear Regulatory Commission (NRC) or an Agreement State, to perform such service.
15. Sealed sources containing radioactive material shall not be opened or removed from the gauges by the licensee.
16. Maintenance or repair of portable devices involving removal of sealed sources from the device or removal or dismantling of shielding may be performed only by the device manufacturer or by other persons specifically authorized by the Bureau, the NRC or an Agreement State, to perform such services.
