Subject: Statistics on Unplanned LCO's (Yellow Ticket #020030038)

On 2/12/03 you requested information on the subject for research on life cycle management. I am the section chief of the Technical Specification Section in NRR. We do not compile unplanned entries into actions required when LCOs are not met. Staff involved with performance indicators likewise do not have such information. This kind of information would be available from plant logs onsite. It is possible that some industry organization such as INPO or NEI has gathered this kind of information. Sorry we couldn't be of more help. Thanks for your question.
