Re: Privacy Act/FOI Act Request

Dear FOI/PA Officer:

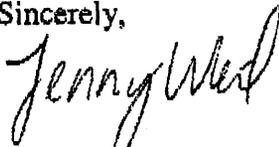

This is a request under the Freedom of Information Act, 5 U.S.C., Section 552.

I am requesting copies of all condition reports (CRs) associated with boric acid deposits on or near the Davis-Besse reactor vessel head that were written between 1996 and 2002. I am also asking the agency to release related CR corrective action items and/or CR closeout documents. The reports may have had different names over the years, such as plant condition adverse to quality reports (PCAQRs). I understand the agency's Davis-Besse Lessons Learned Task Force obtained copies of these Davis-Besse reports during its review of the degradation to the unit's reactor head.

I am a reporter with Inside NRC, an independent newsletter published by the McGraw-Hill Companies, and this request is made as part of the news gathering process. I ask that all search and copy fees be waived.

Please contact me at 202-383-2161 if you have any questions. Thank you for your consideration, and I would appreciate your response within 10 working days of the receipt of this request.

Sincerely,

Jenny Weil
