**Subject:** RE: NRC Order EA-03-009 public meeting question

Mike

I was not able to coordinate with NEI regarding "questions to be addressed" during the upcoming public meeting concerning NRC Order EA-03-009. I am forwarding you our question hoping that you can respond via email and/or during the public meeting.

Order EA-03-009, Section IV, Paragraph E, requires, "For each inspection required in Paragraph C, the Licensee shall submit a report detailing the inspection results within sixty (60) days after returning the plant to operation." Footnote 4 modifies this sentence and specifies, "this reporting requirement supercedes the 30-day reports requested by NRC Bulletin 2002-02."

Does this reporting requirement of Order EA-03-009, Section IV, Paragraph E, also supercede the 30-day reporting requirements of NRC Bulletin 2001-01 and NRC Bulletin 2002-01?

It may be appropriate to formally address this question in writing when responding to the questions raised by NEI. Thank you for your help in this matter.

Sincerely,

Charles Tomes
