comments: Please do whatever it is you can to protect us from "hot" (irradiated) waste materials from the nuclear industry. What I'm referring to are things like pipes, tools, etc., that have been used in the nuclear plants. Please don't let them enter the mainstream garbage dumps, recycling streams, etc. They must be handled in a safe manner. When it's time for my child to get braces, I don't want to find that they glow in the dark!
