Abstract: Occasionally, requests will be made of the Non-Agreement States for information similar to that requested from the Agreement States. Requests will be made on a one-time or as-needed basis, e.g., to respond to a specific incident, to gather information on licensing and inspection practices and other technical statistical information. These information requests will primarily refer to naturally occurring and accelerator-produced radioactive materials which may be subject to State regulations since they do not come under the purview of the Atomic Energy Act, as amended. The reason for requesting such information is that the information can assist the Commission in its considerations and decisions involving Atomic Energy Act materials programs in an effort to make the national nuclear materials programs more uniform and consistent.
