## **NRC TO HOLD A PUBLIC MEETING IN ROSEMONT TO SEEK PUBLIC COMMENT ON SPENT NUCLEAR FUEL TRANSPORTATION TEST PROPOSALS**

The Nuclear Regulatory Commission will conduct a public meeting in Rosemont, Illinois, on March 19, to obtain comments on a proposal to test casks for transporting radioactive spent fuel by rail and by truck.

The proposal is part of the Package Performance Study (PPS) that focuses research on the possibilities and consequences of extreme impact and fire transportation accidents. The proposals are described in a test protocols report that outlines full-scale, high speed spent fuel cask impact and fire testing experiments that NRC is considering sponsoring over the next few years.

The meeting will be held from 8:00 a.m. until 5:30 p.m., at the Embassy Suites Hotel O'Hare, 5500 N. River Road, Rosemont, Illinois.

It will be conducted in a roundtable format with a limited number of invited participants. A facilitator will ensure participation by a broad spectrum of stakeholders, including citizen and environmental groups, nuclear and transportation industries, academia, and governmental representatives at the Federal, State and local level. Others are welcome to attend and will have opportunities to comment on agenda items to be discussed by roundtable participants.

The test protocols report (NUREG-1768) is available for comment at the NRC's website at: <http://www.nrc.gov/reading-rm/doc-collections/nuregs/staff/sr1768/>.

Additionally, copies of the report and other PPS-related documents can be found at <http://ttd.sandia.gov/nrc/modal.htm> or obtained by contacting Ms. Amy Snyder by e-mail at [ams3@nrc.gov](mailto:ams3@nrc.gov) or by telephone at 301-415-8580. Written comments on the report will be accepted until May 30, and can be submitted by e-mail or addressed to Ms. Snyder at the Spent Fuel Project Office, Mail Stop O13-D13, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555-001.
