Washington, DC 20007

SUBJECT: INMETCO

Dear Mr. Thompson:

We have carefully reviewed your letter dated May 27, 1998, concerning the material currently possessed by INMETCO, at their Ellwood City, Pennsylvania facility, which is contaminated with Cs-137. Your letter and INMETCO's request for NRC approval of the disposal of this material raise important policy issues. Therefore, we have forwarded your request to John T. Greeves, Director of the Division of Waste Management in our Headquarters Office in Rockville, Maryland. The Division of Waste Management will respond to you regarding your request. You may contact Mr. Greeves at (301) 415-7437.

Thank you for your cooperation.

Sincerely,

Original signed by A. Randolph Blough

A. Randolph Blough, Director
Division of Nuclear Materials Safety
