

March 26, 2003

MEMORANDUM TO: Richard Laufer, Chief, Section 1
Project Directorate I
Division of Licensing Project Management
Office of Nuclear Reactor Regulation

FROM: Guy S. Vissing, Senior Project Manager, Section 1 /RA/
Project Directorate I
Division of Licensing Project Management
Office of Nuclear Reactor Regulation

SUBJECT: TELEPHONE CONVERSATION WITH REPRESENTATIVES OF
CALVERT CLIFFS NUCLEAR POWER PLANT, INC., CONCERNING
THE LICENSEE'S ONGOING REACTOR PRESSURE VESSEL HEAD
INSPECTION PROGRAM (TAC NO. MB7609)

On Tuesday, March 11, 2003, there was a telephone conference with representatives of Calvert Cliffs Nuclear Power Plant, Inc. (CCNPPI), concerning the licensee's ongoing reactor pressure vessel head inspection program at Calvert Cliffs Unit 2. Unit 2 is currently shut down for refueling and steam generator replacement. Participants in this call included Guy Vissing, Steven Bloom, and Allen Hiser of NRR and several management individuals of CCNPPI including Getachew Tesfay, Bill Holston, Mike Milbradt, Robert Hardies, and others. The attachment provides an agenda of the call. The licensee described its inspection results, including issues of limited inspection coverage on some of the nozzles inspected. With the potential that these issues could affect the licensee's compliance with Order EA-03-009, "Order Modifying Licenses," issued on February 11, 2003, the licensee requested a public meeting with the NRC. Thus, another meeting was scheduled for March 18, 2003, at the NRC Headquarters to discuss the licensee's inspection program.

Docket No. 50-318

Attachment: As stated
