Joel -

This responds to your May 22nd question. We previously discussed with Tom King and others of RES the marked up copy of the proposed NRC work that DOE wants to fund under, in our case, NRC's authority to accept funds for cooperative research. We agreed that the document, now entitled "Advanced Gas Reactor Technology Framework and Fuel Evaluation.," complied with the guidance in my March 2, 2001 note to Tom King "Constraints on DOE Funding Support in Pre-Application Environment (PBMR)."

Brian
