SEQUOYAH NUCLEAR PLANT (SQN) - IMPLEMENTATION OF INTERIM RADIOLOGICAL CONTROL
AND CHEMISTRY ORGANIZATION

In order to provide additional management support and focus in the Chemistry and Environmental areas, effective immediately, I am implementing the attached functional organization. The final decision on management of these functional areas will follow approval of our organization by corporate Nuclear Power. In the interim, responsibilities will be as indicated on the attached chart.

I appreciate the continuing support of our management staff during this interim period. Each manager and supervisor will be requested to assume additional responsibilities and invest an additional measure of their time and energy into the smooth implementation of our new organization. I think these changes will provide significant long-term improvements in our programs and in the overall plant performance of our plant.

If you have any questions regarding this matter, please call me.

Charles Kent
