Subject: Re: Davis-Besse

The ACRS meeting went long -- WAY long Mike watched a bit of it instead of having this meeting with us, and heard the AIT presentation of the licensee's performance issues. So, what remains is to meet with Mike and make sure he has the information about the physical situation and our part in assessing the risk of the Davis Besse head cavity and the more general PWR CRDM nozzle circumferential cracking problems. Mike wants to do that Monday. I will be out Friday. So, Jin, please arrange a time with Mike. My schedule is open except for the normal telecon with Davis Besse, which starts at 1 pm

Steve

Why not Friday morning?

NRR

Jin,

NRR

Yessie should have set it up for 3.30, but I haven't seen the revised meeting appointment e-mail.

Steve

✓ Mark,

NRR

I checked Mike's schedule, and tomorrow afternoon looks like it would work for him and me. How about you?

Jin, can you make it tomorrow afternoon?

Steve

Steve & Jin,

NRR

Can we schedule a time for a briefing for me, and then Michael if he wants one (I'm sure that he does) on Davis-Besse?

Thanks,

Mark
