Subject: second search - high RCS pressure

Oak Ridge Nat Lab

Steve,

Attached is a second search for high RCS pressure for PWRs since 1980. The search has 183 LERs in it. I found an omission in the search we did that had more than 700 LERs. The erroneous search did not limit the RCS problems to high pressure so we got a lot more LERs than we should have. The revised search results make more sense.

Mike
