Subject: Davis-Besse RPV Head Meeting

I've reserved room 9B4 for Tuesday, July 2, for 10 a.m. to discuss our wish-list for the existing Davis-Besse RPV head. Latest information is that the licensee has scheduled removal of the RPV head from containment on August 19

We need to decide what is needed (so far we have requests for the wastage area of nozzle 2 and the area surrounding nozzle 46) and then decide how it is to be paid.
