Subject: Re: Fwd: EPRI Report on Crack Growth Rates for Primary Water Stress Corrosion Cracking in Thick-Wall Alloy 600 Material

Michael,

It looks like printing out the attachments will be a real job, especially since some will need to be printed in color and 2 look like they are not WordPerfect or Adobe Acrobat files (probably Word files)

Would it be asking too much to have you or your designated intern get a complete set of documents printed for each reviewer, probably using Repro help?

Steve

Hello.

NRR

Attached is the MRP crack growth rate report that many of us have been waiting. Prior to any formal review by NRR, I need to request a TAC and discuss priority with our immediate supervisors. Then we need to conduct a proprietary determination and acceptance review.

No Action is Required at This Time.

Cordially,
Michael Marshall
