Subject: Progress on Responses to RIII SSA Questions

Doug-

As we discussed on Tuesday, engineering has been able to make better progress than had been expected on preparing responses to Region III's questions on the Safety Significance Assessment that was submitted on the docket to the NRC on April 8, 2002. We are projecting that the responses to these questions, except "1.d" should be submitted to the NRC by June 12 (As discussed previously with the NRC staff, the response to "1.d" involves more time to perform the calculations). If we can submit the responses sooner, we will do so.
